Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 5, 45-63, and 87-103, drawn to a communication system between drivers and a multi-channel, multi-media, communication queuing system using a command definition, classified in class 719, subclass 328.

II. Claims 104-105, drawn to a communication system between a driver and multiple devices using agents, classified in class 709, subclass 202.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using a command definition as a common communication interface. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
